

ACE Chair

D00315T

Learning is everywhere

WAXMAN

Claudio Francesco Bellini (Italy)

"The inspiration of the ACE chair is born a normal day of work in the streets of Milan. I observed with admiration the typical Milanese seat, also made from a single body and always a symbol of mobility in Italy. Back in the studio, I began to imagine a chair, with the same principle, easy to read, a chair that was integrated into the daily life of every person, just like the chairs of the Milan transportation tram/bus."

Ergonomic one-shell design

The ACE chair is driven by the idea to rethink the one-shell chair archetype. Outlines of the plastic shell gracefully flow from the seat to the back and create a loop which gently embraces the back cushion.

Ultimate comfort

ACE Series adopted high quality memory foam which passed California Flame Retardant Standard. It's safe, durable, flexible and super comfortable which offers you great seating .

Selected materials

After a variety of comparisons and tests, we selected the smooth and breathable fabric and leather . It is light and breathable, no sticky feeling after long hours seating.

Multiple learning modes

ACE-T is a perfect extension of ACE. Based on the iconic shape of the ACE seat, it adopted the flexibility for teaching, so that students can learn independently or quickly transition to a combined form which cultivate students' active learning awareness and habit of collaboration, so that students could have better performance.

Suitable for both hands

The ACE-T has a large writing tablet that has enough space for documents and electronic equipment, The pen tray could stabilize pen and the independent cup holder leaves the writing board more space.

The tabletop rotates 55° / The pipe bends 90°

Safe storage

The base of ACE-T provides a unique storage solution for students' backpacks and other items. This makes the teaching mode convenient and fast when it needs to be transformed. It also allows personal belongings to be stored safely and easily accessible.

Rich ACE Family Series

Design, high-end materials and originality are all important factors that make this chair outstanding. The interchangeable design of multiple bases is the unique highlight that made a rich set of ACE family series.

Smart solution
