STEEN

Freek Roels

Elementary shapes and timeless proportions give the side tables from the STEEN (stone) collection universal applicability.

Their solid appearance is softened by rounded lines and a subtle play of volumes.

Marmorino finishing evokes the tactility and density of natural stone, inspiring the collection's name.

Available in various heights and diameters, the STEEN side tables can be effortlessly arranged in a variety of interiors. Either solitary, as a sculptural statement, or in dialogue with each other as a multi-levelled ensemble.
